1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Garlepp on June 14, 2004.

The application has been amended as follows: amend claim 11 as follows:

A monolithic semiconductor optical device comprising:

a common semiconductor substrate [having] configured to have an electric absorption modulator formation area and a DFB laser formation area;

an AlGaInAs-based quantum well electric absorption modulator (EA modulator) formed in the electric absorption modulator formation area and having an aluminum-based EA modulator active region not being included as part of a mesa stripe configuration;

a quantum well structure distributed feedback laser device (DFB laser) formed in the DFB laser formation area and having a non-aluminum based DFB laser active region being included as part of a mesa stripe configuration;

means for generating a coherent light; and

means for modulating the coherent light at a modulation rate greater than 10 GHz.

2. The following is an examiner's statement of reasons for allowance: claims 1-11 have been rejoined and allowed because they have been amended to recite the same allowable limitations that render the method claims allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
